IF ONLY SHE COULD TALK...

I knew my rambunctious Jack Russell Terrier, Laura Jane, had things to say that I just couldn't understand. A friend gave me a gift certificate for a consultation with Lydia. So I dialed the phone, initially skeptical about talking to an 'animal communicator' or 'pet psychic'.

Well, Laura Jane told Lydia a lot of things - why she didn't like being stroked on the top of her head; why she disliked one neighbor; why she was obsessed with riding in the car; it all just came spilling out of her! I listened and learned and laughed out loud. Among other surprises, I was able to confirm from her previous owner -- yes, she had chased sheep!

Laura Jane has to take a pill for heart disease twice a day, but often spat it out. I described the constant struggle to give LJ this life-saving medication and Lydia gave me practical tips. Lydia also told LJ directly that if she wanted to live, she had to eat them every single day. Imagine my amazement when I hung up & Laura Jane followed me to the kitchen with a resigned look on her face. From then onwards she has continued to voluntarily eat the pill with her food. I wouldn't have believed it if it hadn't happened right in front of my eyes!

Thank you, Lydia, for successfully helping me and all 3 of my rescue dogs live happier, healthier lives.

Lydia explains how animal communicating works:

I first 'ask' the pet what they want to 'talk' about by sending pictures and questions, including what you need to know. They send back pictures, emotions, and physical sensations. I feel these in my body and then verbalize them to give you the answers you seek about behavioral problems, health issues, solving mysteries, plus choosing and helping shelter & rescue pets.
